THE CRAFT PRINCIPLE

Since 1977 we have been actively involved in the research and development of ventilation and moisture dispersal properties for different fabrics. The fruit of these efforts is the Craft Principle, our way of providing functional training and competition wear that ensures the best body microclimate (the temperature and moisture conditions closest to the body) for optimal performance. An intensive training session will result in the body producing a considerable amount of sweat. This is just how it should be and a confirmation that you are pushing your limits. If you are not wearing functional clothes, the sweat will remain in place and block the pores, causing your body heat to rise. Eventually the clothes will turn into a damp, cold and heavy “envelope”, relentlessly hampering your performance. If you are wearing functional clothes, however, the skin will stay dry and you will be able to perform at an ideal working temperature. Craft’s functional clothes, in up to three layers, create a perfect microclimate and provide the basis for optimal performance. Each layer is equally important and complements the rest of the chain.

BASELAYER

Baselayer that efficiently transports moisture away from the skin and distributes it on the outside of the garment, where it either evaporates or is passed on to the next layer. For optimal performance and comfort, craft baselayer should always be worn underneath your outer layers, regardless of weather conditions.

MIDLAYER

Craft midlayer provides insulation and warmth while transporting moisture and excess heat to the next layer or into the surrounding air. When the thermometer creeps downward, this layer enables you to retain valuable body heat without reducing your freedom of movement.

PROTECTION LAYER

The third and outermost layer is your shield against the elements and provides comfort and performance no matter the conditions. Transcending the laws of logic, craft protection layer protects against rain, wind and cold at the same time as it releases surplus heat and moisture from the layers underneath.

SPORTS WEAR

Our Sportswear collection works excellent both for relaxation and promotional purposes. Made of soft and functional materials, including four different fleece and sweatshirt fabrics, and featuring coated as well laminated fabrics, Sportswear provides great function and excellent comfort.

BASE LAYER

Craft is a pioneer in performance baselayer and offers functional garments that provide excellent body-temperature management during exercise in any condition. The fabric structures and knitting techniques interact to efficiently transport moisture away from the skin and distribute it on the outside, where it either evaporates or is passed on to the next layer for optimal performance and comfort.

WHAT DOES IT MEAN?

ACRYLIC	see Synthetic fibers.
BONDED FABRIC	are two different layers of fabric combined into one.
CANVAS	is an extremely heavy duty fabric, often made of cotton. Used for making sails, bags, shoes and other functions where sturdiness is required.
CVC	(Chief Value Cotton) is a mix of high quality cotton and polyester, where cotton is more than 50%.
EASY CARE	is an expression that means easy to handle and manage through time. The product has been treated mechanically or with chemicals to make ironing or pressing easier. The treatment will fade away over time.
ELASTAN	is a common name for a synthetic fiber known for its exceptional elasticity. One of the most famous is LYCRA®.
FLEECE	is the common name for a soft fabric, usually made of polyester. Have a short pile and the fabric is both warm and breathable.
GAUGE	is the unit of measure that refers to the knitting machines fineness size.
INTERLOCK	is a joined closely knit textile fabric, mostly used as lining.
COMBED COTTON	is a soft version of cotton, a method where the shorter fibres have been removed leaving the fibres well paralleled. The yarn takes colouring better, will get stronger and softer.
CARDED COTTON,	compared to combed cotton, this process is not as smooth, having more fibres "sticking out" and is often a little bit rougher.
LYCRA®	is a registered brand from INVISTA, see Elastan.
MESH	is a "net" looking textile, often used in the inside of sport garments.
MICRO FLEECE	is the same as fleece but with a shorter pile. See fleece.
OPEN END SPINNING	is a technology for creating yarn without using a spindle. It's not suitable for thin yarn.
PIQUÉ	is a weaving style, normally used with cotton. Characterized by raised parallel cords or fine ribbing.
POLYAMIDES	see Synthetic fibers.
POLYESTER	is the most important fiber of all synthetic fibers, see synthetic fibers.
PU	is an abbreviation of Polyurethane, which is a water resistant film (or coating) used for example on outdoor wear as jackets and bags.

REGENERATE FIBRE	is the name of art silk developed of the cellulose fibre. Most common is viscose, modal and acetate.
RIBBING	is a pattern in which vertical stripes of stockinette stitch alternative with vertical stripes of reverse stockinette stitch. It gives more elasticity.
RINGSPUN FABRIC	means of taking the rougher feel of raw cotton and making it smoother to the touch. Essentially, the process for producing ring spun fabric involved using a spinning method, such as on a spinning wheel, to create a slightly finer thread.
RIP-STOP	is a light-weight nylon fabric with inter-woven ripstop reinforcement threads in a crosshatch pattern.
SINGLE JERSEY	a fine fabric most often used to make t-shirts.
SOFT SHELL	is a term used on soft materials with the ability to block water partially, and comes with different degrees of water resistance and breathability.
SYNTHETIC FIBERS	is a collection name of all fibres that have been artificially produced out of synthetic polymers. Most common is polyester, polyamides and acrylic.
TACTEL	is a trademarked brand produced by Invista. It has a cotton like feel.
T/C	is a shortname for polyester/cotton mix, where polyester makes ca 65%.
TWILL	comes from a method of weaving textiles that have a high wear and tear quality. Jeans, work wear and some shirts are often made from twill.
VISCOSE,	see regenerate fibres.
VELCRO®	is a brand name of fabric hook-and-loop fasteners, but it's so well known that it has become the generic term for a type of product.

BRANDED FABRICS & FEATURES

VENTAIR™ X

VENTAIR®
FABRIC THAT PROVIDES EXCELLENT WATER PROTECTION, VENTILATION AND COMFORT FOR A WIDE RANGE OF SPORTS. THE DEDICATED ATHLETE'S CHOICE.

VENTAIR™ X wind

VENTAIR® WIND
FABRIC THAT OFFERS EXCELLENT WIND PROTECTION, VENTILATION AND COMFORT IN WINDY CONDITIONS.

VENTAIR represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

PrimaLoft® Silver Insulation is engineered for a full spectrum of benefits – millions of air pockets trap body heat in extreme conditions and lack of bulk means great freedom of movement for the activity. The PrimaLoft® proprietary treatment ensures excellent performance as the insulation maintains its warmth properties even in wet conditions. On top of all that, PrimaLoft® Silver Insulation is designed for durability in a lightweight design for active applications, packability, breathability, and softness.

WINDSTOPPER® products are totally windproof and offer reliable protection from the wind-chill effect. As a result the body can devote more energy to the activity than to regulating the microclimate. This means you can stay outside longer enjoying your favorite activity in the widest range of weather conditions.

WINDSTOPPER INCLUDES FEATURES AS SNOW AND WATER RESISTANT, OUTER SHELL WINDSTOPPER® MEMBRANE & INNER LAYER.

A. CHEST

Wrap a tape measure evenly around the fullest part around the chest under your arms.

B. WAIST

Wrap a measure tape around your natural waistline.

C. SHOULDER AND SLEEVE LENGTH

Measure from the lowest part of the neck, over the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

C1. SLEEVE LENGTH

Measure from the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

D. SEAT

Standing with your feet together, measure around the fullest part of your hips.

E. INSIDE OF LEG

Standing with your feet together, measure from the crotch all the way down to the floor. Don't forget to stand as straight as possible. You may have to ask a friend to help you.

F. LENGTH

The total length of your body.

G. UNDER THE BUST

Wrap the tape around your body, approximately one cm under the bust.

CARE INSTRUCTIONS

To keep your functional sportswear in top condition for a long time, it is important that you take care of them properly. Always follow the care instructions that come with the products. And **DO NOT** use fabric softeners when washing functional sportswear. The softener forms a thin sheath around the fibers, thus reducing the fabric's functionality (moisture transport and ventilation).

L1 & L2

- Do not use fabric softeners
- Close all zippers
- Wash garments inside out
- Remove the garments from the washing machine when the cycle ends
- Hang dry

L3

- Do not use fabric softeners
- Close zippers, velcro openings, buttons and buckles
- Wash garments inside out
- Remove the garments from the washing machine when the cycle ends
- Dry in a drying cabinet or a drying room

DOWN GARMENTS

- Wash the garments inside out
- Tumble dry with tennis balls until the garment is dry

ACCESSORIES

- Follow the care instructions that come with the product
